Storage at home & transporting

The boat can be built by using stitch and glue method for the easiest construction. With 6mm plywood for the main parts and laminated 2 layers of 6mm for the middle transoms for extra strength.

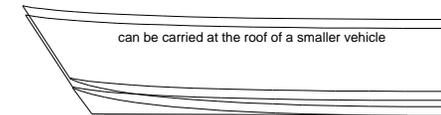

where to store this canoe in the winter?
right in the middle of your living room for sure.

but how?

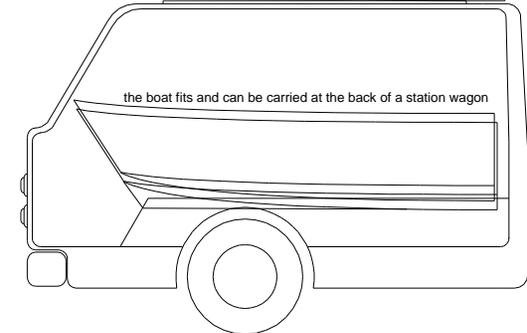

let me introduce you to your new twin bookshelves or giant CD storage with speaker cabins :)

Use 6-8mm marine plywood.
strengthen the rubrails by using additional wood.
Air filled pillows tightly fastened to the boat at the back of two passengers will make the trip comfortable and also will provide buoyancy in case of a capsiz. Or watertight compartment can also be made for additional safety.

can be carried at the roof of a smaller vehicle

the boat fits and can be carried at the back of a station wagon
